SECTION 4. FIRST AID MEASURES

First aiders should refer to section 8 for appropriate PPE

4.1 Description of first aid measures

If inhaled

- : Move the exposed person to fresh air immediately. If person is not breathing, contact emergency medical services, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison centre or doctor for further treatment advice.

In case of skin contact

- : Wash with plenty of water and soap.
Remove and wash contaminated clothing before re-use.
If symptoms persist seek immediate medical attention.

In case of eye contact

- : Seek immediate medical attention.
Eyes should be washed immediately with plenty of water, also under the eyelids for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.

If swallowed

- : Seek immediate medical attention.
Rinse mouth and, if conscious, give 2 glasses of water. Never give anything by mouth to an unconscious person.
DO NOT INDUCE VOMITING.
Oxygen or artificial respiration if needed.

Risk of: Nose bleeding, chronic bronchitis.

Skin Contact

- : Irritation
Risk of: Burn, erythema, blisters or even necrosis.

Eye Contact

- : Severe eye irritation
Risk of serious damage to eyes
Symptoms: Redness, Lachrymation, swelling of tissue.

Ingestion

Symptoms: Nausea, Abdominal pain, Vomiting, Diarrhoea, Risk of chemical pneumonitis from product inhalation

4.3 Indication of immediate medical attention and special treatment needed

- : Consult with an ophthalmologist immediately in all cases.
If accidentally swallowed obtain immediate medical attention.
When symptoms persist or in all cases of doubt, seek medical attention. Because of the likelihood of corrosive effects on the gastrointestinal tract after ingestion, attempts at evacuating the stomach via emesis induction or gastric lavage should be avoided.
